

Lying on the Ground Looking Up, chronicles the story of a life and career affected by the ravages of alcohol and drug addiction. From a relatively poor family to a successful career, the author details his lifelong struggle with addiction ultimately costing him the enjoyment of his family and the loss of his hard earned career. Not just a recitation of drunken debauchery but rather a heartfelt journey through the life of an individual who risked losing everything he loved to satisfy his insatiable addiction. The author details his early childhood as the son of an alcoholic father and a hard working mother responsible for keeping everything together. Some may enjoy this passage through a childhood set in a different and much simpler period in our culture. A bit humorous at times, this story is told to illustrate the insidious nature of this disease and how it slowly integrates itself into becoming the defining factor in life. As time passes he realizes that there is no normality in his life and that a change will have to take place in order to survive. A chance meeting with a group of like minded individuals, after a stay in a treatment center, leads to a happy ending. After thirty years of sobriety, the author tells his story in anticipation of providing hope to others who may be so afflicted.
